† Proxy is a direct count of something (fee envelopes, ski ticket sales, room rental receipts, sites occupied, traffic counts, etc that represents recreation visitation to a Forest Service site or area by an individual, a group, or a vehicle. The forest reported this number and NVUM data was used to convert the proxy count into a Site Visit estimate .

‡ Complete interviews are those in which the individual contacted agreed to be interviewed, was recreating on the national forest and was exiting the site or area for the last time that day

§ Conversion factor - the factor used to convert the proxy count to a Site Visit estimate , the conversion factor was derived from NVUM interview data.

* A Site Visit is the entry of one person onto a national forest site or area to participate in recreation activities for an unspecified period of time.

& Annual Site Visit estimate is the proxy count multiplied by the conversion factor .
